STRUCTURAL SPECIFICATIONS & SOURCING SERVICES

At H-Arch, creativity and innovation are rewarded with the right products and services that bring your vision to life. The Water Ripple sheets are a perfect example of the formability complex of stainless steel as it engulfs the texture created upon rigorously disturbing a pool of water that has a stunning effect.

Water Ripple Sheets reflect light, create horizontal and vertical ripples, popular for creative landscape designs, and require no maintenance, appealing to Commercial, Residential, and Mega projects.

Applicable On:

Aluminum / Stainless Steel / Corten Steel

Available in all PVD Colors

Blue, Gold, Green, Bronze, Copper, Black, Purple, Champagne Gold, Pink & Violet

Note:

- For customized colors please get in touch with our team.

The water wave effect occurs after the stainless steel surface is polished and pressed, with the help of light refraction, and surrounding reflections, creating a superb visual effect. Suitable applications include hotel lobbies, corridors, canopy ceilings, interior walls, & facades.

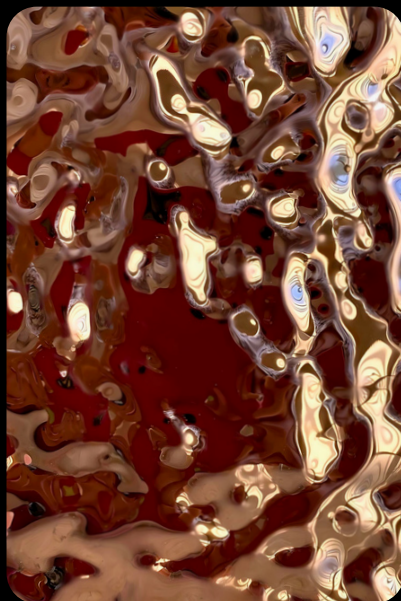

WATER RIPPLE PATTERNS

Micro

Small

Big

Huge

To maintain a seamless and natural look on both the ceiling and wall, each pattern panel we create is uniquely shaped. The water ripple pattern is never duplicated, and the panel joints blend organically. All surfaces harmonize to create a cohesive overall aesthetic, allowing for application without concern for direction or size.

Standard Size - 0.8mm Thickness, Width 1219mm, and Length 2438mm for 4 available patterns

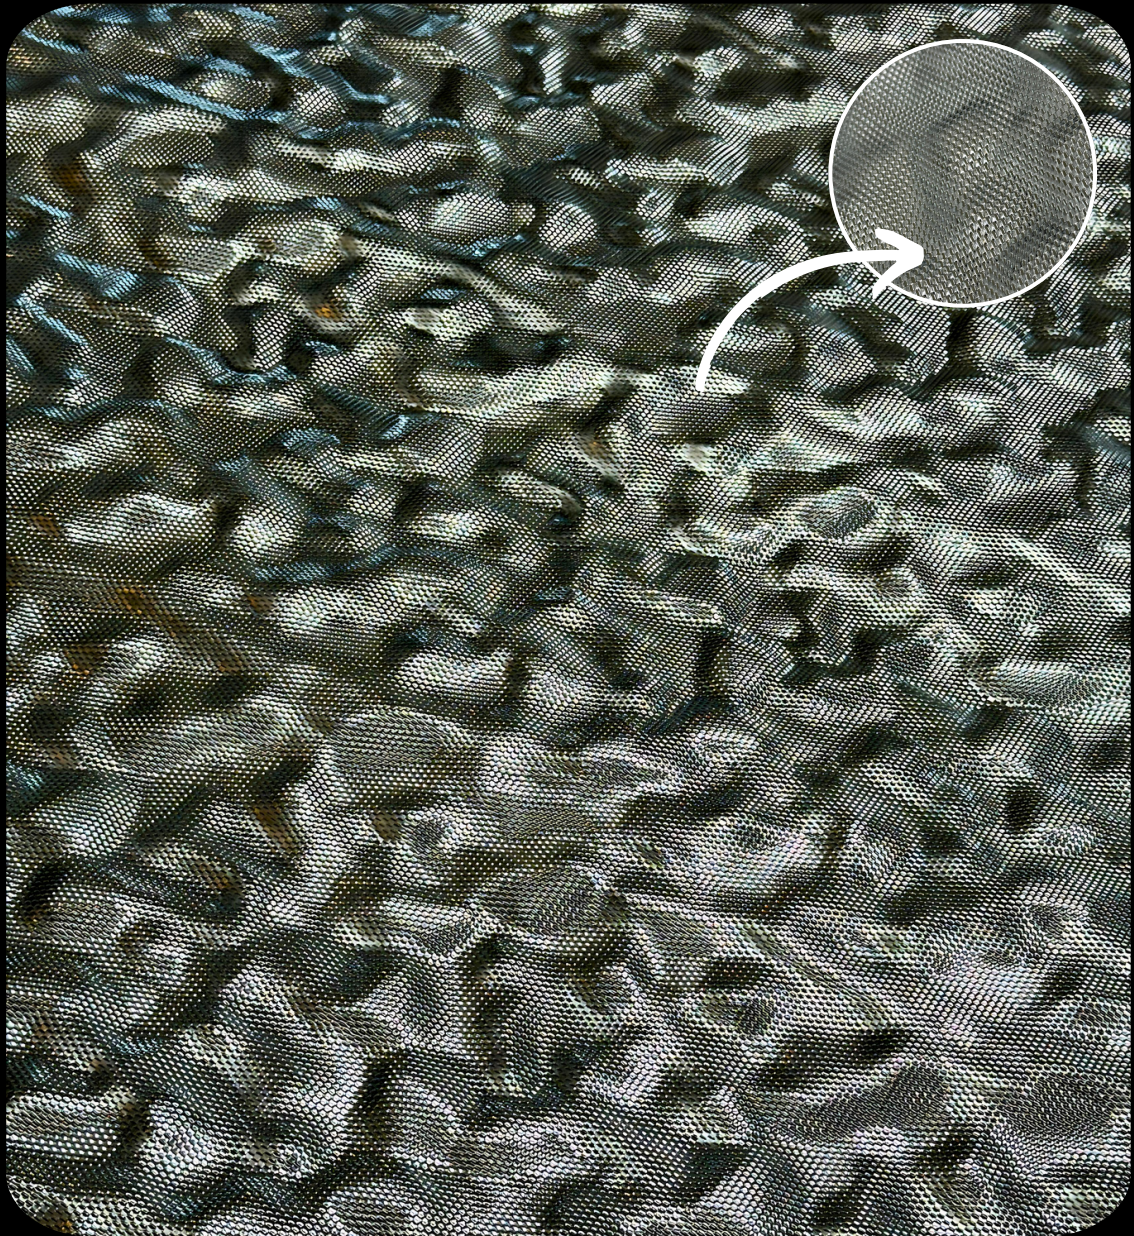

Note:

- Size Customization upon request
- For more details please contact our team

Showcasing our latest Water Ripple Mesh by Hidayath Group, Crafted from high-quality Aluminum, Stainless Steel & Corten Steel it is lightweight yet durable, suitable for various applications.

This innovative mesh can be used for decorative wall panels, architectural elements like facades and partitions, and functional features such as sunscreens. Its open structure allows for airflow and light transmission while providing privacy and security.

OASIS

Water Ripple Mesh

Captivating design, inspired by an oasis in a desert, a refreshing visual amidst the arid landscape, this mesh brings a sense of rejuvenation and tranquility to its surroundings.

Note:
